| Project Name | Project – Retail Store Stock Inventory Analytics |

The screenshot shows the IBM Cognos Analytics with Watson web application. The browser address bar displays `us3.ca.analytics.ibm.com/bl/?perspective=home`. The top navigation bar includes the IBM logo, the text "IBM Cognos Analytics with Watson", a notification bell with 12 alerts, a search bar, and user profile icons. A progress bar at the top indicates "Analyzing Inventory Management Dataset.csv" with "Cancel" and "Details" buttons. The main content area features a welcome message: "Hello. Welcome to Cognos Analytics with Watson." followed by a sub-header "You can get started right away by taking a look at our introduction video, product tour and Getting Started tab." Below this are two buttons: "Watch video" and "Take a product tour". To the right is a 3D isometric graphic of blue cubes. Below the main content is a "Quick launch" section with four cards: "Upload data" (with an upload icon), "Prepare data" (with a data module icon), "Exploration" (with a magnifying glass icon), and "Present data" (with a dashboard icon). Each card contains a brief description of the functionality. At the bottom, there are tabs for "Get started" and "Recent".

This screenshot shows the same IBM Cognos Analytics with Watson interface as the previous one, but with a successful upload confirmation. The progress bar at the top now displays "Inventory Management Dataset.csv was uploaded successfully." with a green bar and "Hide Details" button. The rest of the interface, including the welcome message, buttons, 3D graphic, and "Quick launch" section, remains identical to the previous screenshot.
